

Antarctic Species

Consider how the climate restricts the forms of life. How many terrestrial land mammals exist there?

Weddell seal
orcas
Rockhopper penguins
Black-browed albatross
Leopard seal
blue whale
Antarctic shag
Crabeater seal
Emperor penguin
Chinstrap penguin
Ross seal
Belgica antarctica
Ixodes uriae tick

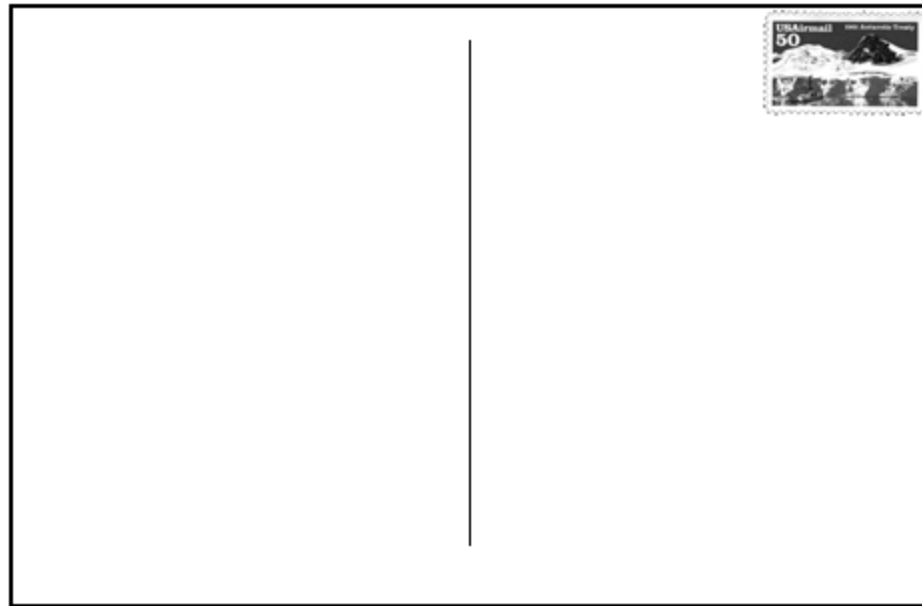

Cut out along outside lines. Fold on dotted lines so text is to outside. Glue the flaps onto your lapbook. Cut out 6x6 inch squares. On each square, write about a different Antarctic species. Illustrate and place inside envelope.

Cut out along outside lines. Fold on dotted lines, so image is to the outside. Flap the text over the top like a matchbook. On the inside, write about the first explorers to reach the South Pole.

Antarctica has thousands of tourists every year. Pretend you are one of these tourists and write a postcard to someone back home.

Antarctic Plants		
What is the most common plant to grow in Antarctica?	What is the only grass to grow on Antarctica?	Where do most plants grow in Antarctica?

Cut along solid lines. Fold on dotted line in half so writing is to the outside. Fold each side in so writing is on the outside. Illustrate the front of the book. Answer the questions inside each flap.

Research Stations

Cut out all along outer lines.
Staple into a book.
