

# T t is for toad at the table

What do you think the man is telling the toad?  
What is the opposite of a toad ON TOP of the table?  
Where do you think the best place for a toad would be?

A toad has little bumps all over his body while a frog is smooth and slippery. Color the frog and the toad above. Then draw a **yellow circle** around the toad and a **green circle** around the frog.
